

Using Examiity with macOS Catalina Transcript

[00:00:01] **NARRATOR:** In order to test with Examiity, you'll need to be able to share your screen. For macOS Catalina users, that means adjusting a privacy setting.

Begin visual description. The computer's "System Preferences" dialog box appears. End visual description.

[00:00:09] You'll go to System Preferences from the dock, navigate to "Security and Privacy," then scroll to "Screen Recording" and find "Google Chrome." Click the checkbox next to the *(Google Chrome)* icon, and then select "Quit Now." You'll now be ready to share your screen with Examiity and you can return to Google Chrome and the Examiity dashboard.

[00:00:39] If you experience any more difficulty, please contact our support team.
